

New Jersey Department of Health and Senior Services
Communicable Disease Service
Influenza Activity Summary
Week Ending March 17, 2007 (MMWR Week 11)

Influenza activity level: **WIDESPREAD**

No Activity- At least 2 of 3 parameters at or below state baseline **AND** no lab confirmed cases

Sporadic – At least 2 of 3 parameters above state baseline **AND** confirmed laboratory cases anywhere in the state within previous 3 weeks **OR** at least one laboratory confirmed outbreak in an institution anywhere in the state

Local – At least 2 of 3 parameters above state baseline in a single county **AND** confirmed laboratory cases from that same county within the previous 3 weeks (other counties may be above baseline without lab confirmed cases) **OR** confirmed outbreaks in 2 or more institutions in a single county

Regional – At least 2 of 3 parameters above state baseline in ≥ 2 but ≤ 10 counties **AND** laboratory confirmed cases from these same counties in past 3 weeks **OR** confirmed outbreaks institutions in ≥ 2 but ≤ 10 counties

Widespread – At least 2 of 3 parameters above state baseline in > 10 counties **OR** institutional outbreaks in > 10 counties **AND** lab confirmed influenza cases in previous 3 weeks.

Parameter = School, emergency department, or long term care weekly surveillance data

Baseline is calculated by taking the average of statewide percentages of ILI for a 3 year (2004, 2005, 2006) period during months when influenza is less likely to be circulating (May-August). Weeks in which less than 4 counties reported were not included in the calculation.

New Jersey Department of Health and Senior Services
Statewide Influenza Activity Levels

Regional Data

REGIONAL ACTIVITY – NW, CW, and CE LOCAL ACTIVITY – NE and South

NOTE: More the half of the counties reporting in the NW, CW and CE public health regions were above state baseline and more than half the counties had laboratories confirmed influenza by viral isolation in the previous three weeks. Only one county in the NE and South public health regions were above state baseline and had laboratories confirmed influenza by viral isolation in the previous three weeks.

Public Health Regions

NW Region (Morris, Passaic, Sussex, Warren)

NE Region (Bergen, Essex, Hudson)

CW Region (Hunterdon, Mercer, Somerset)

CE Region (Middlesex, Monmouth, Ocean, Union)

South Region (Atlantic, Burlington, Camden, Cape May, Cumberland, Gloucester, Salem)

No Activity- At least 2 of 3 parameters at or below state baseline **AND** no lab confirmed cases in the public health region

Sporadic – At least 2 of 3 parameters above state baseline **AND** confirmed laboratory cases anywhere in the public health region **OR** at least one laboratory confirmed outbreak in an institution anywhere in the public health region

Local – At least 2 or 3 parameters above state baseline in a single county of a public health region **AND** confirmed laboratory cases from that same county within the previous 3 weeks (other counties may be above baseline without lab confirmed cases) **OR** confirmed outbreaks in 2 or more institutions in a single county of a public health region

Regional – At least 2 of 3 parameters above state baseline in at least half of counties of public health region **AND** laboratory confirmed cases from these same counties in past 3 weeks **OR** confirmed outbreaks institutions in at least half of counties of public health region counties

Widespread – Not used for public health region data

Public Health Region Influenza Data

Laboratory Surveillance

To date, 261 influenza specimens were found to be positive by viral culture. The below chart describes the number and type of influenza by MMWR week and county.

Influenza Laboratory Report
Viral Culture Positive Specimens by MMWR Week

Influenza-like Illness (ILI) Surveillance*

Emergency Departments

During week 11, 6.03% ILI was reported statewide from emergency departments. This is an increase over the previous week (5.73%). The percent ILI for each county ranged from 0.00 to 24.53%. The percent ILI for this same week last year was 5.39% in emergency departments. The percent ILI for the northwest (5.01%), northeast (6.65%), central west (7.94%), central east (6.38%) and south (4.80%) public health regions were above state baseline (3.71%).

New Jersey Department of Health and Senior Services Influenza-like Activity - Emergency Departments

Long-term Care Facilities

During week 11, 0.84% ILI was reported statewide from long term care facilities. This is an increase over the previous week (0.77%). The percent ILI for each county ranged from 0.00% to 4.58%. No reports regarding ILI/respiratory outbreaks in communal living facilities were received in week 11. The percent ILI for this same week last year was 1.21% in long-term care facilities. The percent ILI for the central west (1.60%) public health region was above state baseline (1.05%).

New Jersey Department of Health and Senior Services
Influenza-like Activity - Long Term Care Facilities

School Absenteeism

During week 11, schools reported 5.87% absenteeism. This is an increase over the previous week (6.25%). The percent ILI for each county ranged from 3.47 – 8.20%. The percent absent for this same week last year was 5.13%. The percent ILI for the northwest (6.38%), the northeast (5.87%), the central east (6.57%) and the south (5.82%) public health regions were above state baseline (4.68%).

Influenza-like Activity - School Absenteeism**

Sentinel Provider Surveillance

At the time of this report no reports were received for week 11.

UPDATE

During week 10, 2.85% of sentinel provider patient visits were due to ILI. These data reflect reports from fourteen (30%) of the enrolled sentinel providers.

During week 9, 1.98% of sentinel provider patient visits were due to ILI. These data reflect reports from nineteen (40%) of the enrolled sentinel providers.

Pediatric Influenza Surveillance

To date, NJDHSS has received 63 reports of pediatric illness. To date, seven cases have met the case definition for pediatric illness or death associated with influenza.

122 City Mortality Report

During week 10, 8.43% of all deaths reported by the vital statistics offices in 6 New Jersey cities (i.e., Camden, Jersey City, Elizabeth, Newark, Paterson, Trenton) were due to pneumonia or influenza. This was a decrease over the previous week (8.92%). The percentage of death due to pneumonia or influenza for this same week last year was 5.13%.

RSV Reports

During week 11, 13.49% of all RSV samples tested were positive. This was an increase over the previous week 13.08%. The percent of samples positive RSV for this same week last year was 11.65%.
